# About Aftermath Islands

**Aftermath Islands Metaverse** is a global digital open-world with realistic, high-fidelity graphics that requires no download, is browser based, and works on mobile, tablets and computers.

Aftermath Islands works in your browser, just like your favorite on demand streaming service. In Aftermath Islands users and organizations can buy, develop, trade, sell and reward virtual goods and services.

Our Creator program enables world class designers and businesses that are looking to make their original virtual designs, services and products available to Aftermath Islands users.

Our DevShard program, available to qualified Creators, allows for the approved sale in our Shopify store(s) and conversion of LOONS, our in-Metaverse currency to Fiat funds.

# Creator Program

The Aftermath Islands Creator program is available to qualified designers and businesses that wish to sell their originally designed virtual products and services in the Aftermath Islands Metaverse.

Potential program participants can review the product design specification below:

- Virtual Item
- Wearables

You can [sign up here](#), to learn when the program launches.

# DevShard Program

The Aftermath Islands DevShard program will be available to qualified Creators and builds on that program, providing participants the ability to sell their original virtual goods and services through both the Aftermath Islands Shopify store and in-platform (coming soon).

Only approved Creators can apply for the DevShard program and acceptance is at the sole discretion of Aftermath Islands Metaverse Limited.

To learn more about the Devshard Program and when it will be launching, please [click here](#).
